RE: Mahopac Beach Sewer Improvement Line RTE 6N  
CSD#1 Connection

ATT: Jeff Contalmo, P.E.

Dear Jeff,

The Town Board has recently reviewed the one set of preliminary (plans sheets) and your engineer's report dated September 16, 1992 for the above referenced project. These have also been submitted to the Putnam County Health Department by their letter of September 18, 1992.

RECEIVED  
PUTNAM COUNTY  
ENV. HEALTH SERVICES  
1992 OCT -9 PM 12:30

These plans and reports need to be amended/revised in the following manner:

1. Plan General Note #1 is to be amended to delete the phrase "...and become property of sewer district".
2. Plan General Note #2 should reference future hook up of Fairy Island lots also.
3. Plan General Note #3 shall be deleted in its entirety.
4. Plan General Note #7 shall be amended to delete any reference to dedication.
5. Plan General Note #10 shall be added to required that all water meter flow data supplied to the Putnam County Health Department shall also be supplied to the Town of Carmel monthly.
6. Plan General Note #11 shall be added to grant the Town of Carmel the right of inspection similar to that granted to the Putnam County Health Department.

Similar amendments and revisions, required the Town Board's decisions not to accept dedication of the line, and not to extend CSD#1 to the area, will be required in your engineering report and your application to the Putnam County Health Department.

page 2  
October 1, 1992

Additional detail and definition of how the service line will be blocked, i.e. prevented from being used until all approvals are obtained and all inspections have been made should be added to the plans and details.

We note that the NYC/DEP Mahopac STP is currently under Consent Order with the NYS/DEC. I believe that the Consent Order may prohibit additional connections to CSD#1 at this time. Evidence of the applicant obtaining NYC/DEP and/or NYS/DEC approval should be submitted to the Town of Carmel prior to activation of the system proposed.

The following items were also discussed by the Town Board at their September 30 meeting:

1. There will not be any extension of Sewer District #1 to service Mahopac Beach.
2. Any individual connections via this line will be considered out of district contracts.
3. Any line installed along Route 6N will have to be installed in accordance with NYS/DOT permit requirements.

Please submit suitably revised plans and reports when available.

Yours truly,

Vincent L. Soukup, P.E.  
Town Engineer
